

Reliable. Compliant. Cost-Effective.
The Clear Choice For Financial Institutions.

For over 20 years, Triton has been manufacturing advanced financial products. Recognized as the leader in off-premise ATMs and ATM software, Triton has built a reputation for success based on service, reliability and performance. The company that reset the bar for ATM affordability and performance for retail establishments is doing it again for the financial market. Triton is emerging as the new choice for banks and credit unions that want a trusted and proven partner, but are no longer willing to pay the high prices associated with traditional ATM ownership.

Today, financial institutions are improving performance by taking a closer look at every aspect of their operations. And when it comes to their ATMs, many are looking at harder-working and more affordable

machines. It's a decision that is bringing many of them to Triton. For banks and credit unions interested in delivering compliance and customer convenience at a reasonable cost, Triton is the clear choice.

- Low cost, full-function ATMs
- Appearance and features popular with financial institution customers
- Complies with accessibility and security requirements
- Multiple communication options
- Trusted installation and service partners
- Modular design for future expansion

FT7000
 Full-Function ATM

Expand your network. Not your budget.

Introducing the all-new FT7000, Triton's latest high-quality ATM for financial institutions. The cost-effective full-function FT7000 lets you expand your network without expanding your budget.

With an industrial-grade, PC-based platform, an Intel® Pentium® IV processor, Microsoft® Windows® XP Pro Operating System and Triton's open-platform Prism™ software, the FT7000 is fully XFS-compliant with emulation support, assuring seamless integration and eliminating the need for expensive upgrades. Whether a walk-up or drive-up model, your FT7000 can be retrofitted into virtually any existing through-the-wall opening. Its innovative design helps you meet customer needs today, while being prepared for any future upgrades.

Develop and deploy new optional Web services with Prism's simple HTML interface. Enjoy customized, branded content with a 15-inch, 1024 X 768 XGA color display. Create more private and user-friendly transactions with the FT7000's walk-up design and privacy filter option. Protect every transaction with complete security compliance, including an internal camera port.

The all-new FT7000 family of ATMs. The full-function solution that makes financial sense.
